

46 believe that PA criteria are always based on evidence-based medicine or specialty
47 society guidelines;³ and
48

49 **WHEREAS**, capitated payment models like Medicaid Managed Care and
50 Medicare Advantage Organizations (MAOs), in which private companies are paid fixed
51 amounts per enrollee based on expected costs regardless of whether the actual cost
52 was higher or lower, create an incentive to minimize enrollee services and maximize PA
53 denials;⁹ and
54

55 **WHEREAS**, reporting by the Office of Inspector General (OIG) for the United
56 States Department of Health and Human Services has frequently shown that many
57 denials were inappropriate, with a 2022 report finding that 13% of PA denials met
58 Medicare coverage requirements and 18% of payment denials met Medicare coverage
59 rules and internal reimbursement guidelines;⁹ and
60

61 **WHEREAS**, a 2023 Kaiser Family Foundation (KFF) study as well as two
62 separate OIG reports found that, although just 11% of PA denials by MAOs are
63 appealed, the vast majority of appeals were either completely or partially overturned;¹⁰⁻
64 ¹² and
65

66 **WHEREAS**, the KFF study and OIG reports noted that their findings were
67 particularly concerning because the appeals process was largely underutilized by
68 beneficiaries and providers with only 1% to 27% of initial denials ever being appealed,
69 meaning insurers are incentivized to deny coverage knowing only a small portion of PA
70 decisions will be formally appealed;¹⁰⁻¹² and
71

72 **WHEREAS**, despite increasing evidence of inappropriate PA denials by insurers,
73 there currently is no consensus on how to hold insurers liable for denials that result in
74 preventable injury to patients, with largely unsuccessful litigation strategies ranging from
75 bad faith breach of contract to negligent breach of duty, and at least one effort in Texas
76 preempted by the Employment Income & Retirement Act of 1974 (ERISA);^{4,13-14} and
77

78 **WHEREAS**, even when state statute or case law permits a bad faith claim
79 against an insurance company for a wrongful coverage denial and the claim is not
80 preempted by ERISA, it's often impossible to recover punitive damages, which may
81 require proving that the insurance company acted with a higher degree of intent than
82 that required for compensatory damages;¹⁵ and
83

84 **WHEREAS**, in a recent New York case in which a delayed PA approval resulted
85 in the preventable, rapid progression of a woman's cancer, the U.S. District Court for
86 the Southern District of New York ruled against the woman when it held that existing
87 New York law does not impose a duty of reasonable care on insurance companies that
88 engage in PA review, highlighting the need for aggressive state legislative reform to
89 increase liability for state-regulated insurers;¹⁶ and
90

91 **WHEREAS**, efforts to hold insurers liable for PA denials that result in preventable
92 injury have been slowed by the increasing use of mandatory arbitration clauses in
93 beneficiary contracts, which require beneficiaries to settle disputes out of court by an
94 impartial third party rather than before a jury or judge and often include waivers that
95 prevent beneficiaries from bringing class action suits;¹⁷⁻¹⁸ and
96

97 **WHEREAS**, a 2019 review of arbitration clauses used by Fortune 100 companies
98 found that many of the nation’s largest health insurance companies, including
99 UnitedHealth Group, Anthem, Aetna, and Cigna, impose mandatory arbitration clauses
100 with class waivers on consumers;¹⁸ and
101

102 **WHEREAS**, mandatory arbitration clauses are particularly insidious in health
103 insurance contracts given the wide gap in bargaining power between the insurance
104 company and beneficiary and limited selection of alternate insurers as a result of
105 increasing consolidation in insurance markets;¹⁹⁻²⁰ and
106

107 **WHEREAS**, while arbitration may be preferred by some individuals, data
108 suggests it is generally bad for consumers, as the median award for medical
109 malpractice claims in Kaiser Permanente’s arbitration program is nearly \$400,000 less
110 than median awards for medical malpractice jury trials in California;²¹ and
111

112 **WHEREAS**, in addition to the federal Improving Seniors’ Timely Access to Care
113 Act (H.R.3173), nearly 90 prior authorization reform bills have been proposed in current
114 state legislatures, many of which draw on our AMA’s model legislation, but none of
115 these proposed bills that have received AMA support address insurers’ legal liability
116 when patients are harmed by prior authorizations;²²⁻²³ and
117

118 **WHEREAS**, though the OSMA has advocated extensively for the reformation of
119 PA, its efforts have focused largely on streamlining the process rather than creating or
120 enforcing legal liability for PA denials that injure patients;^{27,28} and therefore
121

122 **BE IT RESOLVED**, that our OSMA advocate for increased legal accountability of
123 insurers and other payers when prior authorization leads to patient harm, including but
124 not limited to the prohibition of mandatory pre-dispute arbitration and limitation on class
125 action clauses in beneficiary contracts.

228
229 OSMA Policy:

230
231 **Policy 09 – 2016 – Prior Authorization for Patients Injured at Work**

- 232 1. The OSMA shall survey physician members who are treating patients with work related
233 conditions to determine the problems associated with obtaining prior authorization for treatment
234 including procedures and medications.
235 2. The OSMA shall request that the Bureau of Workers Compensation and self-insured
236 employers address the problems associated with obtaining prior authorization for patients
237 injured at work to allow treatment of patients to occur in a timely and appropriate manner.

238
239 **Policy 19 – 2018 – Prior Authorization for Durable Medical Equipment (DME)**

- 240 1. Denials of prior authorization for durable medical equipment (DME) must be based on true
241 medical necessity not arbitrary time limits or other paperwork issues.
242 2. The OSMA continue to work to improve the prior authorization process including working with
243 our Ohio Congressional Delegation and our American Medical Association to improve the
244 process for Medicare Managed Care plans.
245 3. The OSMA Delegation take this policy to the American Medical Association Annual Meeting.

246
247 **Policy 14 – 2019 – Compensation for Prior Authorization Services**

- 248 1. The OSMA opposes pre-authorization as a requirement for patient care.
249 2. The OSMA shall seek legislation that provides for appropriate compensation to physician
250 offices for expenses incurred in obtaining prior authorizations for patient care.

251
252 **Policy 23 – 2022 – Prohibit Reversal of Prior Authorization**

- 253 1. The Ohio State Medical Association (OSMA) supports legislation to prohibit retroactive denial
254 of a previously approved medication, procedure, or test unless the patient is no longer insured
255 by that company at the time of service.
256 2. The OSMA delegation to the AMA will take this topic regarding reversal of prior authorization
257 to the AMA House of Delegates to advocate for this change as a part of their greater effort to
258 eliminate prior authorization all together.

259
260 **Policy 10 – 2023 – Supporting Increased Access to HIV Prevention Medication**

- 261 1. The OSMA opposes prior authorization requirements for HIV pre-exposure prophylaxis
262 (PrEP) and post-exposure prophylaxis (PEP) medications.
263 2. The OSMA supports requiring state-regulated payers to cover full costs of HIV prevention
264 medications and related services, including screenings, diagnostic procedures, administrative
265 fees, and clinical follow-ups in-person or via telemedicine, without any cost-sharing obligation
266 for the plan holder.
267 3. The OSMA supports legislation requiring all payers in Ohio to add long-acting injectable
268 variations of PrEP to their formularies to ensure that they are accessible to eligible patients.

269
270 **Policy 25 – 2023 – Codifying Efforts for Legislative Action on Prior Authorization**

- 271 1. The OSMA will seek legislative solutions to reduce the burden of prior authorization
272 requirements.

273 2. The OSMA advocacy team will report back annually to the House of Delegates on the status
274 of prior authorization advocacy efforts unless deemed unnecessary by Council.
275
